CERTIFICATE

This is to certify that the project entitled “Next-Access AI: Nominee-Based Access System” is a genuine work of Vedant Gandhi Gupta, bearing Seat No. I-23016. It was submitted in partial fulfilment of the requirements for the degree of BACHELOR OF SCIENCE in INFORMATION TECHNOLOGY from the University of Mumbai.

Abstract

Nominee-Based Access System is an advanced digital platform designed to securely store and manage personal, legal, and property-related information. The system employs **multi-factor authentication**, utilising fingerprints, facial recognition, and password protection with hints, to ensure maximum security. It allows users to assign one or more trusted **nominees** who can access their data in the event of the user's death or incapacitation, ensuring that sensitive assets and documents are safely transferred to the rightful person. The core objective of this system is to provide a reliable solution for **digital inheritance management**, combining security, accessibility, and automation. It safeguards user data from unauthorised access while maintaining availability when required. By integrating **biometric verification** and **AI-driven access control**, the platform ensures a high level of trust and transparency. Designed with **scalability, privacy, and modern cybersecurity principles**, the Nominee-Based Access System offers a forward-thinking approach to secure document management and legacy planning. This project highlights the growing importance of digital security and demonstrates how intelligent systems can redefine data protection and inheritance in the digital era.

ACKNOWLEDGMENT

The successful completion of the project “**Nominee-Based Access System**” would not have been possible without the support, guidance, and encouragement of several individuals who contributed directly or indirectly throughout the project's course.

First and foremost, I would like to express my heartfelt gratitude to our **I/C Principal, Mr Santosh Gawade**, for providing the necessary facilities and a conducive environment to carry out this project successfully.

I owe my sincere thanks to our respected project guide, **Asst. Prof. Vijaya Yogesh Rane**, for her invaluable guidance, constant supervision, and continuous encouragement throughout the development of this project. Her expert advice and insightful suggestions were instrumental in shaping the project into its final form.

I am also deeply thankful to all the **teaching and non-teaching staff members** of the **Information Technology Department** for their consistent support, cooperation, and motivation during the project. Their help and timely assistance made this endeavour a rewarding learning experience.

Lastly, I extend my gratitude to all my **friends and family members** for their understanding, moral support, and encouragement, which kept me motivated throughout this journey.

I am thankful and fortunate enough to get constant encouragement, support and guidance from all the Teaching and non-teaching staff of the Information Technology Department, which helped us in completing our project work. Also, I would like to extend our sincere esteems to all staff in the laboratory for their timely support.

DECLARATION

I hereby declare that the project entitled “**Next-Access AI: Nominee-Based Access System,**” done at **Adarsh Vikas Mandal Karmaveer Bhaurao Patil College of Arts and Commerce**, has not been duplicated in any case to submit to any other university for the award of any degree. To the best of my knowledge, besides me, no one has submitted it to any other university.

The Project is done in partial fulfilment of the requirement for the award of the degree of **BACHELOR OF SCIENCE (INFORMATION TECHNOLOGY)** to be submitted as a final semester project as part of our curriculum.

Vedant Gupta

TABLE OF CONTENTS

Chapter 1: Introduction	1-3
1.1 Background Information	1
1.2 Objectives	2
1.3 Purpose, Scope & Applicability	2-3
1.3.1 Purpose	2
1.3.2 Scope	2
1.3.3 Applicability	3
1.4 Achievements	3
Chapter 2: Survey of Technologies	4-5
Chapter 3: Requirements and Analysis	6-14
3.1 Problem Definition	6
3.2 Requirements Specification	6
3.3 Planning and Scheduling	8
3.4 Software and Hardware Requirements	8
3.5 Preliminary Product Description	11
3.6 Conceptual Models	11
3.6.1 System Flowchart	12
3.6.2 Use Case Diagram	13
3.6.3 Sequence Diagram	14
Chapter 4: System Design	15-24
4.1 Basic Modules	15
4.2 Data Design	15-19
4.2.1 Schema Design	15
4.2.2 Data Integrity and Constraints	17

4.3 Procedural Design	19-22
4.3.1 Logic Diagrams	19
4.3.2 Data Structures	20
4.3.3 Algorithm Design	21
4.4 User interface design	23
4.5 Security Issues	24
4.6 Test Cases Design	24
Chapter 5: Implementation and Testing	25-67
5.1 Implementation Approaches	25
5.2 Coding Details and Efficiency	29-63
5.2.1 Coding Details	29
5.2.2 Coding Efficiency	63
5.3 Testing Approaches	63-64
5.3.1 Unit Testing	63
5.3.2 Integration Testing	64
5.3.3 Beta Testing	65
5.4 Modifications and Improvements	66
5.5 Test Cases	67
Chapter 6: Results and Discussion	68-81
6.1 Test Reports	68
6.2 User Documentation	73
Chapter 7: Conclusions	82
Chapter 8: References	83
